

ABSS Solutions, Inc. acquires 1st American Systems and Services to expand its Service Offerings and Client Solutions

Upper Marlboro, MD- November 3, 2017 – Increasing its investments in capabilities that help federal clients modernize information technology systems, today ABSS Solutions Inc. (ASI), a Maryland Based Information Technology Company, announces the acquisition of 1st American Systems and Services, LLC. The acquisition will result in the expansion of ASI's service areas to include Program Management, Training & e-Learning in a multitude of IT disciplines; Health Care IT; Engineering Services inclusive of Independent verification and validation (IV&V) and a host of Management and Administrative Services. ASI is pleased to now serve a host of federal clients in the Department of Defense and Civilian spaces.

Russell D. Henderson, Jr. President/CEO

ASI is committed to providing customer organizations with proven and low-risk processes for implementing and modernizing legacy technology infrastructure and applications. The company also specializes in providing quality IT professionals to organizations at affordable rates. ASI's current client list includes organizations including state and local governments and utilities such as the State of Maryland, the Washington Suburban Sanitary Commission, the US Air Force, US Securities and Exchange Commission, The US Navy and more. This acquisition strategically aligns the two firms' capabilities to enhance their ability to offer quality solutions to prospective clients.

President and CEO Russell Henderson expressed, "The acquisition of 1st American increases our combined employee base to over 150 full time personal operating on three continents and seven countries. It raises our ability to support larger and more complex efforts. This is clearly a new day for our company."

About ABSS Solutions, Inc.

ABSS Solutions, Inc., (ASI) is a Maryland Based Information Technology Company formed in 2007. ASI is currently providing a host of Staff Support Services which encompass IT staffing, outsourcing and consulting including support areas of project and network management, and application development, Integration Services to include Cloud storage and Operations, Law Enforcement Business Intelligence, Internet Security and Audio/Visual systems integration.
